

FORM. FUNCTION. FLEXIBILITY.

ULTRA RLX™- An acoustical hybrid floor solution that combines a highly stable core, unique connection system, and innovative backing that sticks to the floor without being sticky, making it the ultimate choice for any flooring application.

INNOVATIVE DESIGN

- Special formulated core balances rigidity, flexibility, comfort, and stability
- Acousti-Grip™ backing improves adherence over most subfloor systems
- DuFlex™ Connection System is a unique hybrid edge connection system that secures planks vertically and horizontally. This proprietary system enables faster installation and single-plank replacements in 5 minutes
- High performance cushion layer mitigates sound transmission and adds comfort including anti-fatigue and fall impact properties
- NANOCOAT UV™ top finish offers advanced protection against stains, scratches, and abrasion
- No transition mouldings needed

SUPERIOR PERFORMANCE

- Fast installation with minimal adhesive required
- Superior resistance to indentation from appliances and furniture
- Exceeds 50 IIC/STC over most floor/ceiling assemblies (contact FloorFX for more information)
- Supports one hour/two hour fire protection rating in floor/ceiling assemblies without gypsum-based subfloors
- Installable under cabinets, plumbing fixtures, and other objects fastened through the floor
- Simple single-plank replacement on any part of the floor
- Odorless and resists mold and mildew
